

Creative Services

An early pioneer in product packaging design, Stephen Gould designers have helped establish many of the industry standards that unite a product's function with aesthetics. Today, our structural and graphic design services division utilizes paperboard, corrugated, plastic, as well as wire, metal and wood for in-store fixtures.

Our designers specialize in product protection, display, point-of-sale layout and brand identity management.

Clients benefit from our creative resources that include original design, 11th-hour touch-up, negative conversion, SLA and prototyping capabilities.
